Deploy to Phonegap I am developing an application using ionic2, and i want to deploy it to phonegap. So, how can i do that? My target is to deploy this app to android and ios mobile phones. A: Well, if you're using cordova-plugin-ionic-keyboard, it requires both, cordova-plugin-cordova-sqlite-storage and cordova-plugin-ionic-keyboard. So install all of them in your project, and then run: ionic cordova plugin add cordova-plugin-ionic-keyboard cordova-plugin-cordova-sqlite-storage if you need a new version you have to use ionic cordova plugin add cordova-plugin-ionic-keyboard --variable

ability to merge the physical and digital worlds, allowing for untethered mobile access to your most important memories. The company recently announced it has integrated that functionality in to the Android app, allowing you to make and edit scans or take snapshots of handwritten notes, and then easily insert them into your notebooks. "This update brings handwriting recognition to Evernote for Android phones, capturing handwritten notes as text," the company said in a statement. "Just doodle in Evernote, and when you're done, hit the Evernote button to turn your notes into text, or hit the pen button to turn any image into a note in Evernote." The feature has been available on iOS for some time now, and so it's nice to see that it's finally made its way to Android. If you use Evernote on your phone, and if you're an Android user at all, you may want
